

Sodexo Dietetic Internships
Innovative • Inclusive • Individualized

ELECTRONIC PORTFOLIO INFORMATION

Your portfolio is an important part of your application. It is a way to tell us about you, your interests, hobbies, and accomplishments, goals, and commitment. Be creative; include anything that you would like us to know about you. This portfolio is different from your school portfolio or a job- interview portfolio. You can include items from school (papers, projects, awards, etc.) or from your work. And you can also include more personal items--such as interests, accomplishments, hobbies.

We will evaluate the portfolio on how it is put together. Is it neat and organized? Is it easy to navigate, read and understand? The effort you put into it will demonstrate your commitment to wanting to be a part of Sodexo Dietetic Internships. We will also look at the variety of items you include. We are not looking for a large volume of material, but for representations of the scope of your interests and skills. Explain the items that you include and indicate why you included them. **Do not** include documents or forms which you did not develop yourself, such as menus or brochures you may have given out at a health fair.

Some free sites where you can develop your website portfolio include webstarts.com, yola.com, web.com, wix.com and weebly.com. Be sure to click “publish” so we can have access to the site. If you decide to password protect it, include that password on the cover sheet.
